MUNICIPAL WATER CAPABILITIES

FRESH & WASTE WATER

YOUR COMMUNITY RELIES ON YOU. KNOW THAT YOU CAN RELY ON US.

Regular maintenance is critical to keeping you—and your municipality—up and running. That's why Jenkins offers a variety of maintenance services to recondition your pumps and motors back to working order. We specialize in close-coupled, open-coupled and submersible pumps.

REPAIR SERVICES

- Pump and motor repair
- Motor rewind
- Impeller, shaft and housing machine work
- Rebuilding of seals and re-lap sealing faces
- Replacement of seals, o-rings, impellers, moisture sensors and wear rings (maintaining factory-specified tolerances)
- Pressure checking seal chamber
- Inspecting cable for blistering, cuts, swelling or signs of liquid in the cable

ADDITIONAL PUMP SERVICES

- Ceramic coating on impellers and volute for increased flow, efficiency and longevity
- Epoxy paint for pump longevity
- Impeller and shaft balancing prior to final assembly to ensure smooth operation
- Reverse engineering and remanufacturing hard-to-find or obsolete parts in our on-site Foundry

RELATED SERVICES

- Valve Repair
- Hipot/Surge Testing
- Vibration Analysis
- Control System Upgrades
- Asset Monitoring
